Professional Services

Cornerstone Environmental Services offers area home builders and construction companies a wide variety of sound stormwater compliance and erosion control services. Our staff includes experienced, professional personnel to conduct NPDES inspections, permit preparation and production of Storm Water Pollution Prevention Plans.

INSPECTIONS

- Professional courteous personnel
- FDEP qualified
- Inspections printed on site
- Reports available online 24/7 real-time within minutes of inspection
- Custom inspections to fit your unique requirements
- Weekly and after-rain event inspections available
- Stormwater compliance

SWPPP PRODUCTION

- Easy to use
- FDEP and EPA compliant
- Rapid turn-around time
- Customized to meet any internal requirements
- Permit preparation included
- Available online 24/7, including site maps

STORMWATER TRAINING

Our staff can provide stormwater compliance training in a wide variety of options, from small, introductory classes to the FDEP certification course for your staff as stormwater inspectors. An educated staff is the best assurance of compliance and cost reduction. We can answer all of your stormwater and erosion control questions.

STORMWATER CONSULTING

Our experienced staff can help guide you through the permitting process and explain your responsibilities as a site owner or operator. We can provide on-site audits and evaluations of your construction site(s), current SWPPP and maintenance programs. Sound advice helps keep your project in compliance and saves you money at any stage of construction.

On-Site Construction Services

We also provide our customers with a wide variety of on-site construction support services. Our staff and crews have extensive experience installing, maintaining and removing a broad spectrum of structural and procedural BMPs.

- Regular site maintenance and cleaning
- Silt fence installation and removal
- Inlet protection
- Erosion repair
- Major and minor site grading
- Site cleaning
- Street sweeping and more

SITE MAINTENANCE

- Custom maintenance packages
- One stop turn-key contractor
- Silt fence
- Inlet protection
- Curbside BMPs
- Concrete washouts
- Stabilized entrances
- Erosion control mats
- Street sweeping
- Inlet cleaning
- Street scraping
- Wetland clean-up

Maintenance programs can keep sites in compliance with weekly visits and keep the community looking clean and sharp, helping our clients sell homes. We can also bring your project, large or small, into compliance if you are just beginning your stormwater program or are ready to implement new cost saving measures.

EROSION REPAIR

Our expertise in erosion repair and prevention is extensive. We use a number of innovative products to prevent erosion from re-occurring, as well as many tried and true techniques. We also conduct our repairs with minimal footprints, even in post construction situations. Our equipment and personnel can create and repair swales, pond banks and other slopes, including the installation of preventative measures and stabilization.

Stabilization Services

Cornerstone has experience with industry standard and cutting edge technologies. We offer many options of seed and vegetation types, including custom seed mixes, sod stabilization and polyacrilimide (to reduce wind erosion).

SEED AND MULCH

- Custom seed & mulch applications
- Temporary erosion control
- Permanent stabilization
- Custom seed mixes
- Seed/mulch with fertilizer & water applications
- Florida Generic Permit Notice of Termination compliance

HYDROSEED

- Unique seed mixes for very steep slopes
- Minimal site preparation
- Fast
- Soil tackifier to reduce wind erosion
- Mulch options to eliminate rain impact

SOD STABILIZATION

- Cost effective erosion elimination
- Immediate coverage
- Soil, grade, & prep
